

FIRE RESTRICTIONS & CAMPFIRE UPDATE

Update as of October 12, 2026

The Pueblo of Laguna Fire Protection Program has recommended lifting the current Stage 1 Fire Restrictions due to improved vegetation conditions and reduced fire danger across all six villages (Sept. 28th, 2026).

Campfires may be permitted, provided no other applicable fire restrictions or prohibitions are in place.

Fire danger conditions are subject to change based on weather, moisture levels, and vegetation conditions. Hunters are responsible for checking the most current fire restrictions immediately prior to their scheduled hunt.

All hunters are encouraged to exercise caution with campfires and ensure fires are completely extinguished before leaving the area. All hunters are encouraged to practice responsible campfire safety by utilizing existing fire rings or established fire pits whenever possible. Campfires should remain small, attended at all times, and be completely extinguished with water before leaving the area. Hunters should also minimize disturbance to surrounding vegetation and natural resources.

Please continue to check this webpage for updates regarding fire restrictions throughout the 2026–2027 hunting season.

For additional information or clarification, please contact the Pueblo of Laguna Environmental and Natural Resources Department.
